Device Distribution Guidelines

Terms

Parents of students that are assigned a take home device may be required to pay a non-refundable annual charge. Users will comply at all times with the JPS Technology Handbook guidelines. Any failure to comply may terminate user rights of possession effective immediately and the District may repossess the device. Any lost, stolen or damaged devices must be reported to school authorities immediately according to District mandated time limits and following the District defined procedures.

Title

Jackson Public Schools has legal title to the property at all times. The user's right of possession and use is limited to and conditioned upon full and complete compliance with this agreement and the JPS Technology Handbook guidelines.

Loss, Theft or Full Damage

Should a device be damaged, lost, or stolen the student or parent/guardian should immediately notify the school administration. At that time the parent/guardian will be advised to file a police report. If the device is lost, stolen, or damaged, the parent may be responsible for the full replacement cost. The parent/guardian may be responsible for the full replacement cost if the loss is not reported to JPS personnel within 3 days of a missing device during the regular school term, and/or on the first day of school following a school holiday.

In the event that a device is damaged, and that damage is not covered by warranty, the parent/guardian may be assessed the fee for the repair as outlined in JPS board policy JIAB.

In the event of a lost or stolen device, and once a police report is filed, the Jackson Public School District, in conjunction with law enforcement, may deploy software which may aid the police in recovering the device. Any attempt to remove this location software will violate the Acceptable Use Policy and result in repossession of the device and may result in disciplinary action according to the JPS Student Code of Conduct.

Students who leave Jackson Public Schools during the school year must return the device and all other issued accessories at the time they leave the District. The device and all accessories should be returned to the school administrator or his/her designee. Any fees for damage or loss will be assessed at that time. Failure to pay fees may result in transcripts being withheld per Miss. Code Ann. §37-7-301.

"The District cannot deny a student the right to an education for failing to pay for damages or for failure to return school property, however, the District can withhold the awarding of the physical diploma and transcript of a graduating senior for failure to pay fines or fees or for the failure to return District property."

Procedures for a stolen device

- Always report a lost or stolen device to a school administrator immediately.

Filtering

The Jackson Public School District filters the internet on all District owned, take home devices both at school and off campus. Access to web sites, web resources, content, and online tools is restricted as required to comply with Children's Internet Protection Act (CIPA), the Children's Online Privacy and Protection Act (COPPA), and the JPS Acceptable Use Policy. Web browsing may be monitored, and user web activity records may be retained indefinitely.

All users are expected to respect the web filter as a safety precaution and shall not attempt to circumvent the web filter when using the internet. The access to web sites and materials and the determination of whether material is appropriate or inappropriate is based solely on the content of the material and its intended use. If a user believes a site has been erroneously blocked, the user should follow the procedures outlined on the web filter block page in order to have the web site reviewed. Asking for a site to be unblocked does not guarantee the site

will be unblocked.

Any intentional action to circumvent the District safety and security tools may result in disciplinary action as outlined in the JPS Student Code of Conduct.

Although JPS employs filtering technology and employs other safety and security tools to protect users, the District makes no guarantee as to their effectiveness, nor is the District responsible for any damage or harm to persons, files, data, or hardware.

4. Be considerate when sending attachments with e-mail (where permitted).
Be sure the file is not too large to be accommodated by the recipient's system and is in a format the recipient can open.

IV. INTERNET SAFETY

A. General Warning

All users, and the parents/guardians of minor users, are advised that access to the electronic network may include the potential for access to materials inappropriate for school-aged pupils. Every user must take responsibility for his/her use of the computer network and Internet and stay away from these sites. If a student finds that other users are visiting offensive or harmful sites, he/she

should report such use to the person designated by the school.

B. Personal Safety

Be safe. In using the computer network and Internet, do not reveal personal information such as your home address or telephone number. Do not use your real last name or any other information which might allow a person to locate you without

first obtaining the permission of a supervising teacher. If you are a minor, do not arrange a face-to-face meeting with someone you “meet” on the computer network or Internet without your parent’s permission. Regardless of your age, you should never agree to meet a person you have only communicated with on the Internet in a secluded place or in a private setting.

D. Confidentiality of Student Information

Personally identifiable information concerning minor students may not be disclosed or used in any way on the Internet without the permission of a parent or guardian, or for non-minors, without the person’s consent. Users should never give out private or confidential information about themselves or others on the Internet, particularly credit card numbers and social security numbers.

The schools or district may authorize the release of directory information, as defined by the Family Educational Rights and Privacy Act (FERPA), for internal administrative purposes, approved educational projects, activities, and publications. As stipulated by FERPA, parents will be offered the opportunity to deny publication of directory information. Parents also will be given the opportunity to deny publication of non-directory information such as student work.

E. Active Restriction Measures

The district will also monitor the online activities of students, through direct observation and/or technological means, to ensure that students are not accessing

such depictions or any other material that is inappropriate for minors. Internet access without filters will be offered to employees at specific locations, e.g., Teacher Resource Center, for purposes of bona fide research or other educational projects.

V. E-MAIL

All network users assigned an e-mail account signify by their acceptance of the account their willingness to adhere to this policy regarding acceptable use. Failure to adhere to these guidelines may result in the loss of the electronic mail account and access to the Internet and may lead to further disciplinary action up to and including termination. Furthermore, any activity

that may be in violation of local, state, or federal laws will be reported to the appropriate law enforcement agency.

VI. STUDENT LAPTOP USAGE

JPSD may provide users with laptops or other devices to promote learning outside of the classroom. The district may also provide employees with laptops or other devices for use in their employment with the district. Users, including employees, should abide by the same Acceptable Use Policies when using school devices off the school network as on the school network.

Users are expected to treat these devices with extreme care and caution; these are expensive devices that the school is entrusting to users' care. Users should immediately report any loss, damage, or malfunction to the information technology (IT) staff. Users will be financially accountable for any damage resulting from negligence or misuse.

Use of school issued laptops off the school network can be monitored.

VII. PLAGIARISM

Users should not plagiarize (or use as their own, without citing the original creator) content, including words or images, from the Internet. Users should not take credit for things they didn't create themselves, or misrepresent themselves as an author or creator of something found online.

Information obtained via the Internet should be appropriately cited, giving credit to the original author.

VIII. PERSONAL SAFETY AND CYBERBULLYING

Student users should never share personal information, including phone number, address, social security number, birthday, or financial information, over the Internet without adult permission. Users should recognize that communicating over the Internet brings anonymity and associated risks, and should carefully safeguard the personal information of themselves and others. Users should never agree to meet in real life someone they meet online without parental permission.

If users see a message, comment, image, or anything else online that makes them concerned for their personal safety, they should immediately bring it to the attention of an adult (teacher or staff if at school, parent if using the device at home).

IX. PRIVACY

Network and Internet access is provided as a tool for education and in employment. The Jackson Public School District reserves the right to monitor, inspect, copy, review, and store at any time and without prior notice, any and all usage of the computer network and Internet access and any and all information transmitted or received in connection with such usage. All such information files shall be and remain the property of the district, and no user shall have any expectation of privacy regarding such materials.

IX. FAILURE TO FOLLOW POLICY

The use of the computer network and Internet is a privilege, not a right, and inappropriate use will result in a loss or restriction of network privileges, disciplinary action, and/or referral to legal authorities. The network administrators will close an account when necessary. An administrator or faculty member may request the network administrator to deny, revoke, or suspend specific user access and/or user accounts.

X. WARRANTIES/INDEMNIFICATION

The Jackson Public School District's web site, or individual Jackson Public Schools' sites might link, or connect, to another site that might link to a site that contains objectionable material that the school district does not embrace or promote. It shall not be responsible for any claims, losses, damages, or costs (including attorney's fees) of any kind suffered, directly or indirectly, by any user or his or her

parent(s) or guardian(s) arising out of the user's use of its computer networks or the Internet under this policy. The user or, if the user is a minor, the user's parent(s) or guardian(s), agree to cooperate with the district in the event of the district's initiating an investigation of a user's use of his/her access to its computer network and the Internet, whether that Jackson Public Schools' network access is on a district computer or on another computer outside the district's network.

The superintendent or the superintendent's designee has the authority to amend or revise the Acceptable Use and Internet Safety Contract as deemed necessary and appropriate consistent with this policy.
