

RESPONSIBLE USE OF DISTRICT ISSUED TECHNOLOGY

The Jackson Public School District provides the privilege of technology for use in the schools and distance learning situations. The use of any district technology, including devices and other technology under the Mississippi Equity in Distance Learning Grant Program, shall only be used for its intended purpose and school purposes.

Each user, as well as a minor's parent(s) or guardian(s), is required to sign the Assignment of Fixed Assets and Device Acknowledgement before being permitted to use district technology.

The district may assess fines for any intentional loss or damage to any school district devices.

Each user of district technology will:

1. Use school technology for school-related purposes only.
2. Treat school technology and devices with care and alert staff if there are any problems with operation.
3. Return district technology in the same manner as it received minus normal wear and tear.

The district shall assume the control of ownership and liability for personal devices and other equipment purchased under the Equity in Distance Learning Grant Program until the personal device or other equipment:

1. No longer serves the school or related school purposes for which it was acquired and is sold by public auction under Miss. Code Ann. Section 17-25-25; or
2. Is traded into a vendor as part of a subsequent purchase

The superintendent, or his or her designee, shall compile and maintain an inventory list of all devices purchased and issued to students, teachers and administrators, and other staff, as well as any supporting technology or equipment used to support the school's distance learning plan.
