

PROFESSIONAL VISITORS AND OBSERVERS

One of the ways that Board members and staff members can improve the effectiveness and the quality of education of the scholars is through visitation of school systems with novel, experimental, or innovative programs. Therefore, Board members visit other school systems occasionally and encourage the staff to do so. Recognizing the value of professional visits, the Board also welcomes professional visitors to its own schools.

To ensure the continuity of the educational program and guard against classroom interruption, delegations desiring to visit the system or any particular part of it should make arrangements through the Superintendent. The Superintendent or designee will make the necessary arrangements to have someone knowledgeable in a given area assist them in their visit. This will also ensure that part of the program they wish to visit will be operational upon their arrival and will guard against undesirable interruptions in the scheduled programs of scholars and staff members.
